**Reasons for allowance**

The following is an examiner's statement of reasons for allowance: independent claims 1, 35, 40 and the dependent claims are allowed in view of Terminal Disclaimer filed 1/31/2007 to prior patent US 6,854,135 (serial # 10/369,170) and to prior application 10/853,324. All inventions require a PVA water soluble garment that is capable of being washed without negative effects to the structural integrity of the fabric, where they differ is that the patent claims a coverall and the application claims a scrub, while the instant invention is drawn to a vest. Coveralls, Vests, and Scrubs are all considered obvious variants of any type of garment of the same material, but applicant has filed the previously mentioned T.D. to overcome any double patenting issues. The closest reference, to Zucker, cited in previous office action does not require the washability without loss of structural integrity. In fact, Zucker discloses that the fabric of his invention will degrade at laundering temperatures above 125 degrees F, but has also stated the preferred laundering temperatures in the range of 80-130 degrees F. So clearly Zucker does teach away from a requirement that the fabric not experience any negative effects to the structural integrity of the fabric.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
